

Press Release

Bumi Resources Minerals Reported First Quarter 2013 Results

Jakarta, 30 April 2013

PT Bumi Resources Minerals Tbk ("BRMS" or "the Company") announced its first quarter 2013 financial and operational results today. As previously disclosed, the income contribution from PT Newmont Nusa Tenggara ("NNT") experienced a decline due to the on-going development of the phase 6 at the Batu Hijau mine site. This resulted in the temporary copper and gold production drop. The Batu Hijau mine site is expected to ramp up production upon the completion of phase 6 development.

Despite this temporary production drop, throughout the year 2012, the Company showed operational progress in such projects as the Dairi Prima's zinc and lead concession (secured the underground mining approval from the government), and the Gorontalo Mineral's copper and gold project (reported significant JORC resource estimate of 292 million tonnes of ores). In addition, BRMS manages to maintain a relatively strong Debt to Equity ratio of 0.34x

BRMS is a multi-minerals mining company which is listed in the Indonesia Stock Exchange. Through its subsidiaries, BRMS owns 18% stake in NNT, 80% stake in Dairi Prima Mineral, and 80% stake in Gorontalo Minerals.

Jakarta, 30 April 2013

PT Bumi Resources Minerals Tbk ("BRMS" atau "Perusahaan") melaporkan kinerja keuangan dan operasinya untuk tahun 2012. Seperti informasi yang telah disampaikan sebelumnya, kontribusi laba bersih dari PT Newmont Nusa Tenggara ("NNT") mengalami penurunan dikarenakan oleh pengembangan fase 6 yang tengah berlangsung di lokasi tambang Batu Hijau. Hal ini menyebabkan penurunan produksi tembaga dan emas yang bersifat sementara. Lokasi tambang Batu Hijau diharapkan dapat segera meningkatkan produksinya setelah diselesaikannya pengembangan di fase 6 tersebut.

Terlepas dari penurunan produksi yang bersifat sementara tersebut, sepanjang tahun 2012, beberapa konsesi yang dikelola oleh Perseroan menunjukkan kemajuan dalam kinerja operasinya. Hal ini dapat dilihat di lokasi tambang seng dan timah hitam yang dikelola oleh Dairi Prima (mendapatkan izin penambangan bawah tanah dari pemerintah), dan konsesi tembaga dan emas yang dioperasikan oleh Gorontalo Minerals (melaporkan estimasi sumber daya berdasarkan JORC yang cukup besar yaitu 292 juta ton bijih). Selain itu, BRMS masih dapat mempertahankan Rasio Pinjaman terhadap Modal yang cukup baik yaitu 0.34x

BRMS adalah perusahaan tambang mineral yang tercatat di Bursa Efek Indonesia. Melalui beberapa anak perusahaannya, BRMS mengoperasikan 18% kepemilikan di NNT, 80% kepemilikan di Dairi Prima Mineral, dan 80% kepemilikan di Gorontalo Minerals.
