

## Press Release

### **BRMS visited its gold ore processing plant at Poboya (Palu) with capital market analysts**

Jakarta, 19 November 2019

PT Bumi Resources Minerals Tbk (“BRMS” or “the Company”) visited its gold ore processing plant at the Poboya mine site, Palu, Central Sulawesi on the 13<sup>th</sup> of November 2019. The Company’s management was accompanied by capital market analysts from a few stock brokerage institutions.

During the trip, the analysts visited the processing plant, which include the Crusher equipment, the Semi Auto Genius (SAG) Mill, the Ball Mill, the Carbon in Leach Tanks, the Desorption & Electro Winning units, and the Tailing (Waste Management) facility.

The Company’s CEO (Mr. Suseno Kramadibrata), the Palu’s Project Manager (Mr. Haris Yusuf), the Head of BRMS Technical Services (Mr. Damar Kusumanto), and the Processing Plant Manager at the Palu project (Mr. Ramces Hutasoit), were also present and took turns explaining about the project progress.

Mr. Suseno Kramadibrata explained, “Our gold ore processing plant is now almost 90% completed. We plan to do dry run and wet run tests by end of this year. If the tests are successfully completed, we can immediately do trial production from our Poboya mine site.”

Dry run test is when each equipment and machinery within the processing plant is tested separately. Wet run test is when all of the machineries within the processing plant are tested together at the same time with water, chemicals, and ore samples.
